

油壓電磁比例式引導調整閥 Proportional Electro-Hydraulic Pilot Relief Valves

- ◆ 特性

  - 1.壓力穩定、低噪音。
  - 2.適合傳統式和微電腦式電器控制，可達最佳功能。
  - 3.易微調。
- ◆ Description

  - 1.Pressure stable and low noise.
  - 2.Ideal for traditional and micro-computer type electric control to achieve best result
  - 3.Easy micro-adjusted.

規格 Specification

| 型式號碼<br>Model number | 最高使用壓力<br>Max. Operating Pressure | 最大通過流量<br>Maximum Flow | 壓力調整範圍<br>Pressure Adjusting Range                          | 定額電流<br>Rated Current | 線圈阻抗<br>Coil resistance | 磁滯<br>Magnetic Hysteresis | 再現性<br>Repeatability |
|----------------------|-----------------------------------|------------------------|-------------------------------------------------------------|-----------------------|-------------------------|---------------------------|----------------------|
| EBG-03               | 210 kgf/cm <sup>2</sup>           | 100 L/min              | C:8~140 kgf/cm <sup>2</sup><br>H:10~210 kgf/cm <sup>2</sup> | C:750mA<br>H:700mA    | 10                      | <3%                       | <0.5%                |
| EBG-06               |                                   | 200 L/min              |                                                             |                       |                         |                           |                      |
| EBG-10               |                                   | 400 L/min              |                                                             |                       |                         |                           |                      |
