

◆特性

1. 附壓力補償裝置,讓油壓缸在無論高或低負載,作動速度都保持不變。
2. 附微調刻度環,方便流量調整。
3. 若要可承受較高壓力,回油量大的,可使用TAI系列。

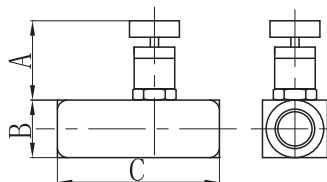

◆Description

1. Compensated type check valves; No matter in either high or low loading, working speed remains the same.
2. Easier to adjust it because of micro scale attached.
3. TAI series is recommended if you are looking for larger oil return capacity and higher pressure.
