General Information

Features

- For subplate mounting mounting pattern to DIN 24 340, form D, ISO 5781, CETOP-RP 121H,
- Three adjustment elements:
 - Rotary knob
 - Sleeve with hexagon and protective cap
 - Lockable rotary knob with scale
- Five Pressure settings
- Optional check valve

General

XCG-2V-10 pressure valves are pilot operated pressure reducing valves, which are controlled from the secondary circuit.

They basically consist of main valve (1) with main spool insert (3) and pilot valve (2) with pressure adjustment element.

At rest, the valves are open, fluid can freely pass from port B to port A via the main spool insert (3).

Pressure present in port A acts upon the bottom side of the main spool. At the same time there is pressure acting on the ball (6) in the

pilot valve (2) via the orifice (4) on the spring-loaded side of the main piston (3) and via the port (5). Pressure from port A is also acting on the ball (6) via the orifice (7), control line (8), check valve (9) and orifice (10). According to setting of spring (11), pressure builds up in front of the ball (6), in port (5) and in spring chamber (12), holding the control piston (13) in the open position. Fluid can freely flow from port B to port A via main spool insert (3), until the pressure in port A exceeds the value set at spring (11) and opens the ball (6). The control piston (13) moves to closing position.

The desired reduced pressure is achieved, when

a balance between the pressure in port A and the pressure set at spring (11) is reached.

Pilot oil drain from spring chamber (14) to tank takes place externally via control line (15).

Free return flow from port A to B can be achieved by installing an optional check valve (16).

A pressure gauge connection (17) allows the reduced pressure in port A to be monitored

Functional Symbols

XCG

(with check valve)

XG

(without check valve)

Series X(C)G2V-10
Model Code

1 Seal Options Blank – Nitrile, for Mineral oil Anti-wear hydraulic oil (class L-HFC), Water glycol (class L-HFC) F3 – Fluorocarbon seals, for Phosphate Ester (class L_HFD)	2 Two stage reducing valve, Gasket mounted, 350 bar rated XCG2V – With reverse flow check XG2V – Without reverse flow check	4 Pressure Range B – 50 bar C – 100 bar F – 200 bar G – 315 bar	6 External port thread F – Metric B – BSP
3 Size ISO6264-10 NFPA/ANSI R10 10 - Cetop 10	5 Adjustment W – Wrench and cover H – Knob K – Lockable knob	7 Design Number 10	

Series X(C)G2V-10

Technical Data

HydraulicTechnical Data	
Inlet pressure, port B	up to 315 bar
Outlet pressure, port A	10 to 315 bar
Drain, port Y	up to 315 bar
Maximum Flow	400 L/min.
Fluid	Fluid Mineral oils to (HL, HLP) DIN 51 524; Phosphate ester (HFD-R)
Fluid temperature range (°C)	-30 up to + 80 (with Nitrile seals) -20 to + 80 (with Flurocarbon seals)
Fluid Viscosity range (mm²/s)	10 to 800
Fluid Cleanliness Level	ISO 19/17/14

Flow Curves

(measured at $\nu = 41$ mm²/s and $t = 50^{\circ}\text{C}$)

Series X(C) G2V-10

Flow Curves

(measured at $v = 41$
 mm^2/s and $t = 50^\circ\text{C}$)

Pilot flow related to flow (B-A) and to pressure ΔP

Pressure drop across check valve for reverse flow

———— ΔP of reverse flow with main stage closed

----- ΔP of reverse flow with main stage fully open

Application Notes

1. The fluid must be filtered. The required fluid cleanliness level is ISO 19/17/14.
2. Surface finish of mating piece is required to 0.01/100mm.
3. Interface Seal Kit # for X(C)G2V-10
02-412610, Nitrile
02-412609, Fluorocarbon
4. Bolt kit for X(C)G2V-10
(6) M10x70 mm
(6) 3/8"-16x2-3/4" UNC ,
MA=430Nm (317 lb-ft)
5. Mounting bolts must be to DIN 912-10.9 class, or Class 12.9 (ISO 898), or SAE Grade 8.

Products we offer:

- Cartridge valves
- DCV directional control valves
- Electric converters
- Electric machines
- Electric motors
- Gear motors
- Gear pumps
- Hydraulic integrated circuits (HICs)
- Hydrostatic motors
- Hydrostatic pumps
- Orbital motors
- PLUS+1® controllers
- PLUS+1® displays
- PLUS+1® joysticks and pedals
- PLUS+1® operator interfaces
- PLUS+1® sensors
- PLUS+1® software
- PLUS+1® software services, support and training
- Position controls and sensors
- PVG proportional valves
- Steering components and systems
- Telematics

Danfoss Power Solutions is a global manufacturer and supplier of high-quality hydraulic and electric components. We specialize in providing state-of-the-art technology and solutions that excel in the harsh operating conditions of the mobile off-highway market as well as the marine sector. Building on our extensive applications expertise, we work closely with you to ensure exceptional performance for a broad range of applications. We help you and other customers around the world speed up system development, reduce costs and bring vehicles and vessels to market faster.

Danfoss Power Solutions – your strongest partner in mobile hydraulics and mobile electrification.

Go to www.danfoss.com for further product information.

We offer you expert worldwide support for ensuring the best possible solutions for outstanding performance. And with an extensive network of Global Service Partners, we also provide you with comprehensive global service for all of our components.
